OSU Moon Tree Dedication

A Celebration Of Apollo 14 and Astronaut Stuart Roosa

**WEDNESDAY
OCT 10, 2012
2-5 P.M.**

**PEAVY HALL
RICHARDSON
ROOM 107**

**FREE AND
OPEN TO ALL**

**2:00 - 2:30
Dedication and
unveiling of plaque**

**2:30 - 3:15
Speaker
Presentation**

**3:15 - 5:00
Reception**

Apollo 14 launched on January 31, 1971 on what was to be NASA's third trip to the lunar surface. Five days later, Alan Shepard and Edgar Mitchell walked on the Moon while Stuart Roosa, a former US Forest Service smoke jumper, orbited above in the command module. Packed in Roosa's personal belongings during the mission were hundreds of tree seeds, part of a joint NASA/USFS project. Upon return to Earth, the seeds were germinated by the Forest Service. Known as the "Moon Trees", the resulting seedlings were planted throughout the United States and the World. They stand as a tribute to astronaut Roosa and the Apollo program.
