

Q2 - Which kinds of projects on the Corvallis campus would you be interested in learning about?

Field	Count
New construction	26
Major renovations	27
Major facilities projects (painting a building, repaving a walk)	13
Projects to beautify the campus (new public art, new landscaping)	26
Projects to improve sustainability on campus	19
Projects to improve transportation on campus	23
Other, please describe	2
I don't want or need to learn about projects on campus	1

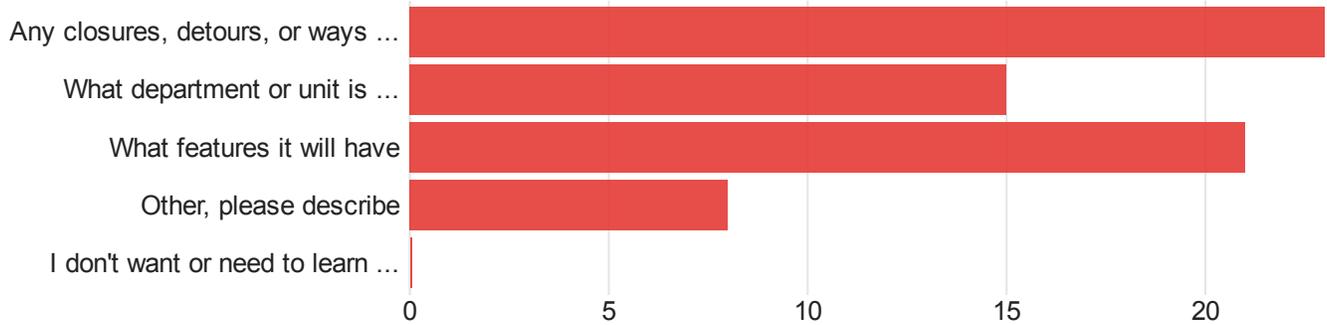

Other, please describe

Other, please describe - Text

Improving democratic access and insight into building and resilience planning.

Warnings of pesticide applications. Better yet, stop using pesticides like Roundup!

Q3 - What aspects of projects on the Corvallis campus would you be interested in learning about?

Field	Count
Any closures, detours, or ways in which day-to-day campus operations would change	23
What department or unit is sponsoring the project	15
What features it will have	21
Other, please describe	8
I don't want or need to learn about projects on campus	-

Other, please describe

Plans for sustainable construction, use, and deconstruction plans.

What it costs the students.

and how much does it cost, who is paying?

Possible toxic exposure and offgassing. For example, the MU applies something nasty to its floors, and people with asthma or other respiratory diseases cannot use the MU for a week or so until the fumes dissipate.

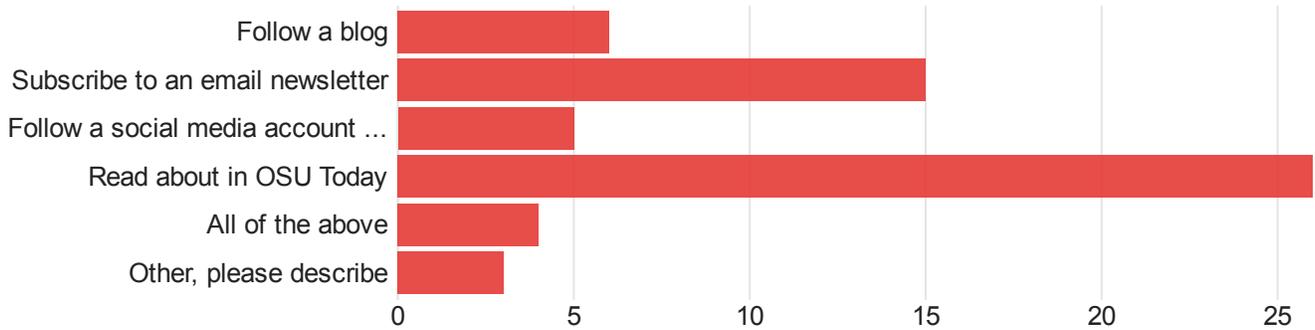

if/how it's available to faculty use

anticipated timeline

How major projects fit into the campus master plan

more parking arcades

Q4 - How would you prefer to learn about projects on the Corvallis campus?

Field	Count
Follow a blog	6
Subscribe to an email newsletter	15
Follow a social media account (i.e., Facebook)	5
Read about in OSU Today	26
All of the above	4

OSU's website could have a small section devoted to this

Whatever it is, there should be input from OSU in the planning stages.

Perhaps receive an alert that an update is available (i.e. on website or other public site)

Q5 - Do you have any other suggestions for construction, remodeling, transportation and other infrastructure project communications on the Corvallis campus?

Do you have any other suggestions for construction, remodeling, transportation and other infrastructure project communications on the Corvallis campus?

I think opening up the discussion of building planning, architectural design for human spaces and aesthetic needs, as well as community involvement beyond OSU is important. I'm super tired of all the same orthogonal brick buildings and industrial spaces, we need some alternatives to show how we can live better.

Define the story of how, and by whom, did the project get funded and who then will be responsible for the new space once it is complete. Full transparency on the life cycle of the project. Lots of rumors fly around here - mostly because there was no story delivered up front. An example: A current project that is stuck in a negative rumor mill right now is the upper division housing project. If this makes it to a public review hearing then we are going to look bad to the OSU community and more importantly the Corvallis community. We have not adequately informed the public or our own people about this project. We are using 2012 data to make a 2019 decision. The public is going to jump all over that.

Please use "green", non-toxic building materials, such as "No VOC" paints, floor coverings, etc. It is very hard to be on campus due to the use of fragrances by people on campus, A "Fragrance Free" OSU policy is necessary. A 2017 study showed that 1/3 of the population suffer adverse health effects from fragrances:
<https://www.sciencedirect.com/science/article/pii/S2211335516301449>

Yes, please have a strong campaign (partnering Public Safety and TaPS) to ensure that all cyclists connected to OSU Corvallis campus are using lights front and back minimum. Bright clothing is also helpful, as are hand signals, as are helmets. There are so many ways to do this, to get the word out. But, it has to be more than just posters and an occasional handout/event. I recommend monthly campaigns with people out on the campus streets / byways actively talking to cyclists and handing out visibility goodies. In addition to safety/laws, this is a town and gown issue. Thank you for listening.

No suggestions, but thank you for the opportunity to provide input!

we need real parking lots that our community can access more easily. We simply do not come to campus any more. Thanks. Every time a new building shows up... it takes over a parking lot.. so real .parking disappears. Please take lessons from other campuses that build in better parking to make the campus be friendly to all.
