Match the process to its name:

1. Convection
2. Evaporation
3. Condensation
4. River flow
5. Precipitation

Mark the coldest place with an X.

Circle the city where it rains the least.
Precipitation Map of Oregon

- 61–200 inches per year
- 41–60 inches per year
- 0–40 inches per year
Satellite data

Geostationary Satellites orbit at the same speed as the Earth spins. The US maintains the satellites to predict weather and study climate. (www.nesdis.noaa.gov.) The images below were taken from the GOES-west satellite. Anyone can access the images at www.goes.noaa.gov.

Is it cloudy in Corvallis at the time this picture was taken? ________________
