**Please RSVP, space is limited!**

**(541) 766-6750 or**

**[chrissy.lucas@oregonstate.edu](mailto:chrissy.lucas@oregonstate.edu)**

**Info:** [womenowningwoodlands.blogspot.com](http://womenowningwoodlands.blogspot.com)

### AGENDA

In this hands-on computer session, learn how to use Google Earth, Oregon Explorer, and Web Soil Survey to explore your property from your desktop. You will create and take home property maps with aerial photography, soil data, topography, fish and wildlife information, and more. These tools are useful if you need to write or update your management plan, or otherwise need to make decisions regarding your forest management.

Time willing, we will tap into a couple social media opportunities that enable us to keep in touch and learn from home.

Women Owing Woodlands Network was formed by Oregon State University Extension Service and women woodland owners who wanted to:

- Recognize the growing number of women taking a wide array of active woodland management roles.
- Support and increase women's access to forestry-related information and encouraging communication through state and local networks.
- Raise basic forestry and decision-making skills through hands-on activities.

## **DIRECTIONS TO CLACKAMAS COMMUNITY COLLEGE**

**Google map: <http://bit.ly/u4MKbA>**

**Clackamas Community College's main campus is conveniently located off the Trail's End Highway 213 in Oregon City - just three miles from I-205. The spacious campus features 17 buildings including the Niemeyer Center for Communication Arts, Roger Rook Hall, and the Art Center, as well as the college's soccer field, track and athletic fields.**

## **Getting Computer Savvy: Google Earth and other Forestry Resources December 2nd, 9:00am - 12:00pm**
